

## HAZARDOUS MATERIALS POLICY

- Atlantic Shipping LLC does *not* accept the following hazardous materials:
  - Class 1 - Explosives
  - Class 2.3 - Poison Gas
  - Class 4.1, 4.2, 4.3 - Flammable Solids, Spontaneously Combustible, Dangerous When Wet
  - Class 5.1, 5.2 - Oxidizers, Organic Peroxides
  - Class 6.2 - Infectious Substances
  - Class 7 - Radioactive Materials
  - Spent Catalyst
  - Hazardous Waste
  - Hazardous Materials Requiring Temperature Control
- A green □ in the table indicates that no restrictions apply.
- The red letter "X" in the table indicates that these materials may not be loaded, transported, or stored together in the same transport vehicle or storage facility during the course of transportation.
- The red double "XX" in the table indicates that these materials may not be loaded, transported, or stored together in the same transport vehicle or storage facility during the course of transportation unless separated in a manner that, in the event of leakage from packages under conditions normally incident to transportation, comingling of hazardous materials would not occur. Notwithstanding the methods of separation employed, Class 8 (corrosive) liquids may not be loaded above or adjacent to Class 4 (flammable) or Class 5 (oxidizing) materials; except that shippers may load truckload shipments of such materials together when it is known that the mixture of contents would not cause a fire or a dangerous evolution of heat or gas.
